### Summery

In acute care services, a drug induced sedated, paralyzed patient is solely depends on nursing care.

A patient with acute lung disease, CNS lesion (trauma, encephalitis, post-surgery) and or compromised organ functions-sometimes needed to controlled ventilation. During that momentum, a patient kept on full nursing care. Ensuring total calorie by either enteral (Ryles tube)/parenteral, orotracheal tube care, Mouth/oral cavity care, eye care, all pressure point care, bowel /bladder care, perianal, genitalia, central venous catheter care, arterial line and other associated services.... Psychological /mental boost up in weaning time, all lifesaving services are depends on skilled empathized bed side nurse. Ensuring critical care- maximize the chances of recovery.

A skilled nurse is responsible for A-to-Z services which is very crucial and plays central role for good outcomes. ensuring 24 hrs good nursing care makes a possibility of miraculous outcomes. All aspects of day – night care (counting in hours) is hope of life expectancy from near death. A good nurse with good mood and intend is a gift from creator for that critical patient oftentimes we forget.

Continuing care and preserving rights of nurses with up gradation of nursing services have great contribution in critical care development. Hospital administrator and Govt. policy level should be harmonized with critical care department for standard blessed services.
